PROFESSIONAL SUMMARY

Fresh graduate with a Bachelor's degree in Informatics Engineering from Universitas Pamulang and an alumnus of the Harisenin Full-Stack Web Development Bootcamp (Batch 20). Possesses strong expertise in building modern web applications using React.js, Vite, and Tailwind CSS for the front-end, along with Node.js, Express.js, and MySQL for the back-end. Detail-oriented, highly disciplined, and eager to contribute effectively as a professional Software Engineer.

TECHNICAL SKILLS (TECH STACK)

Front-End Development
React.js, Vite, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3, Axios

Back-End & Database
Node.js, Express.js, MySQL, RESTful API, JWT, Multer, Nodemailer

FEATURED PROJECTS

Videobelajar - React Front-End

View GitHub →

Tech Stack: React.js, Vite, Tailwind CSS, Axios

- Developed an interactive online course platform featuring user authentication, course selection, and a complete checkout payment workflow.

To-Do List App (React)

View GitHub →

Tech Stack: React.js, JavaScript, Tailwind CSS, Vite

- Built an interactive daily task management application to add, remove, and update task statuses in real-time using React state management.

Edu-Course API Advance

View GitHub →

Tech Stack: Node.js, Express.js, MySQL, JWT Authentication, Multer

- Designed and built an advanced REST API featuring JWT authentication, bcrypt password hashing, and file upload management via Multer.

Edu-Course API Basic

View GitHub →

Tech Stack: Express.js, MySQL, Postman, JavaScript

- Developed a foundational backend system for course data management with full CRUD operations connected to a relational database.

EDUCATION & TRAINING

Harisenin Bootcamp — Full-Stack Web Development (Batch 20)

2026

Completed an intensive end-to-end web development training program covering user interfaces, backend servers, and database management.

Universitas Pamulang — Bachelor of Computer Science (Informatics Engineering)

Graduated 2025

Studied data structures, algorithm programming, software engineering, and relational database design.
